

# LG AUCKLAND

- + Similar to Ambassador with high yields and virus resistance
- + Excellent disease profile with improved Verticillium tolerance

## Breeder

Limagrain UK

## Type:

Hybrid

## AHDB region:

UK-wide

One of the latest hybrids from Limagrain and tested over the past three years in Agrii trials where it has delivered very high yields (110% treated, 89% untreated) and high oils (45.7%). It is a step up from Ambassador in some areas with a slightly faster autumn growth habit (7), slightly quicker to grow away in the spring (7) and shows reduced symptoms of Verticillium stem stripe. In many other ways it is very similar to Ambassador and has quickly become one of Agrii's biggest selling varieties.

Suitable for all soils and regions of the UK for drilling from mid-August right through to mid-September. It has an average height (143 cm) and reasonable stem stiffness (8) (8) but a robust PGR programme is still advised. Avoid very fertile sites or very early drilling. It has mid-maturity (6).

Excellent all-round disease profiles including robust light leaf spot (7) (6) and good phoma stem canker resistance (7) (7). There is good evidence from the breeder and Agrii trials that it is less affected by Verticillium stem stripe (6) compared with Ambassador (5) with fewer pronounced symptoms. It also carries the trait for pod shatter resistance.

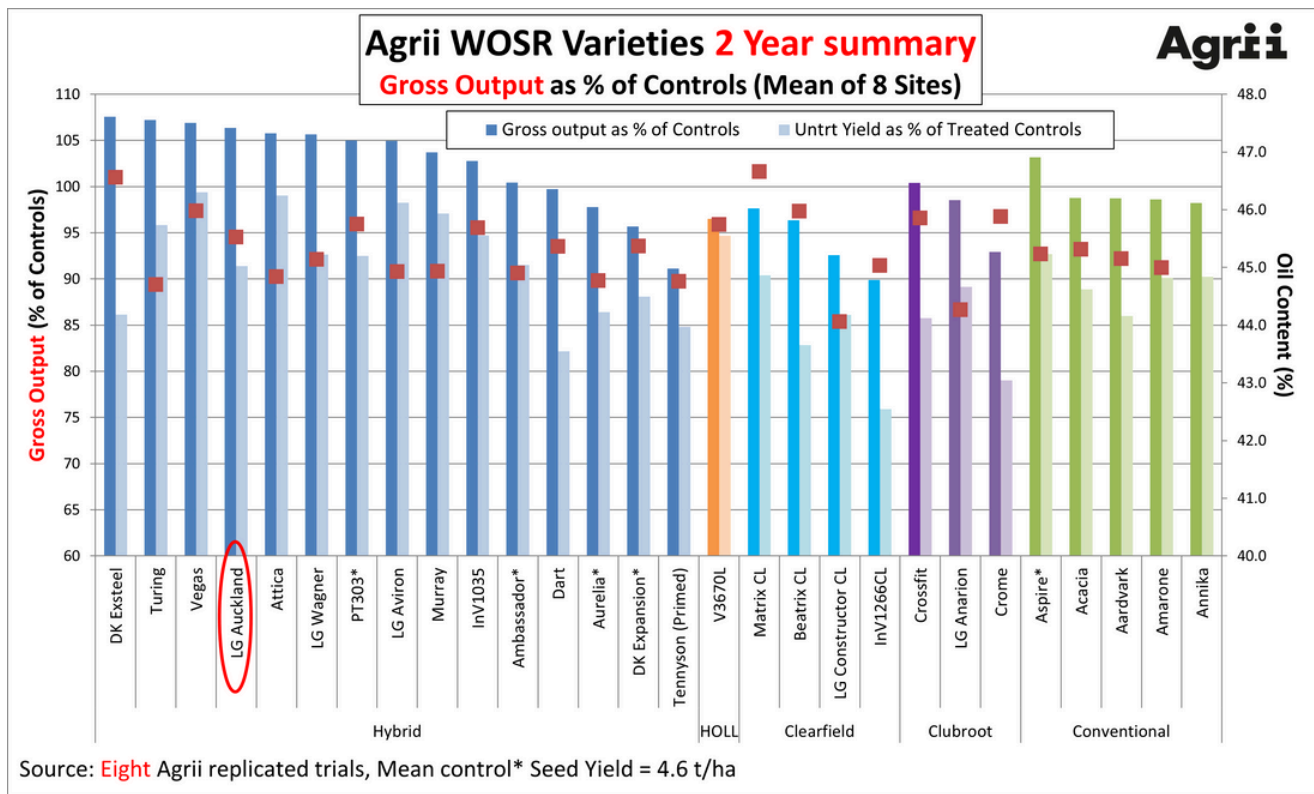

Agrii data	Yield %	UK GO treated (4.7 t/ha)	110
		UK GO untreated	89
		% Oil	45.7
	Agronomy (1-9)	Autumn vigour	7
		Spring vigour	7
		Height (cm)	143
		Lodging	8
	Maturity	6	
	Disease	Light leaf spot	6
		Phoma (AHDB)	7
		Verticillium tolerance	6
		TuYV tolerance	R
	Traits	Pod shatter	R
	Variety Sustainability Rating (VSR)		High

AHDB data	Yield %	UK GO treated (5.3 t/ha)	107
		E/W GO (5.2 t/ha)	108
		North GO (5.9 t/ha)	[104]
		% Oil	45.4
	Agronomy (1-9)	Lodging	[8]
		Stem stiffness	7
		Height (cm)	155
		Flowering	7
		Maturity	6
		Light leaf spot	7
Stem Canker	7
