

Environmental and Gamecover Crops

Welcome to your 2023 HiBird Environmental and Gamecover crops brochure from Agrii!

The new Environmental Land Management (ELM) scheme continues to be rolled out, but we are still awaiting final confirmation and details of some of the elements. The current launch dates are listed below for information:

- **The Sustainable Farming Incentive: launched 2022**
- **The Local Nature Recovery Scheme: full roll out 2024**
- **The Landscape Recovery Scheme: full roll out 2024**

Ahead of the full roll out, the best way for most farmers to get involved in delivering environmental outcomes is to enter the Sustainable Farming Incentive or Countryside Stewardship Scheme and the government have recently announced more money for both schemes. This will help provide a smooth way for people to transition from these schemes into Environmental Land Management from 2024 onwards.

We have included a section in this brochure about the Sustainable Farming Incentive (SFI) which will allow you to choose seed products that will help improve soil health and meet the scheme rules.

We will continue to monitor how the new schemes develop next year but, in the meantime, we look forward to providing you with high quality seeds for the benefit of wildlife and your farm.

Adam Simper

National Grass, Roots, and Environmental Seeds Manager

Limagrain Plant Breeding

As a major international plant breeding company, Limagrain can utilise its breeding programmes to evaluate and commercialise seed products suitable for conservation.

Our maize breeding programme ensures that HiBird maize blends continue to include the very best varieties. They are always tested in the UK for yield, early vigour and standing ability and it's only when a variety has proven itself, that it will be included in the HiBird mixtures.

You will find many of the products that appear in this brochure are bred by Limagrain. There are ongoing breeding programmes currently developing new varieties of the following species:

- Kale
- Rape kale hybrids
- Maize
- Sunflowers
- Cereals
- Oilseeds

Habitats for Wildlife

Crop options for farmland birds, pollinators and grass margin habitats

Creating the perfect habitat is vitally important and will enable future generations to know that we played our part in securing our wildlife and plant populations. The start of this process begins by investing in the right seeds mixture that will allow you to deliver environmental benefits to the highest level. All HiBird seeds contained in this brochure have been fully tested for germination and purity enabling your crop to establish quickly and realise its potential.

Habitats for Wildlife	01 - 05	Sustainable Farming Incentive	12 - 13	Sowing and Cover Guide	32
Crops to Feed Birds	06 - 07	Wildflowers	14 - 16	Contacts	33
Crops for Pollinators	08 - 09	Game & Wildlife Management	17 - 30		
Grass Field Margins	10 - 11	Colour Splash Flowers	31		

Countryside Stewardship

The UK Government will continue to offer Countryside Stewardship agreements in 2023.

Countryside Stewardship will eventually be replaced with the new Environmental Land Management (ELM) scheme. This will follow trialling and testing and a national pilot involving farmers and land managers during the next few years. The full ELM scheme should be in place from 2024. Signing up to a Countryside Stewardship agreement will put you in a great position to join ELM. Joining an environmental scheme will give you a viable, long-term source of income for providing environmental benefits just as the Basic Payment Scheme (BPS) payments start to reduce.

- **Higher Tier is for land that requires more complex management tailored to the individual sites**
- **Mid Tier provides a range of options and capital items that together help to deliver a broad range of environmental benefits. Within the Mid Tier you can choose from:**
 - **Wild Pollinator and Farm Wildlife Package (WPFWP)**
This package groups management options together. This will help you to provide farmland wildlife with the essential resources they need to thrive and breed successfully. WPFWP includes packages for arable, pastoral, and mixed farms.
 - **The Wildlife Offers** provide a simpler set of options to help improve the wildlife on your farm by improving habitats for pollinators, farmland birds and other wildlife.

no matter where they are or what they farm. The paperwork for the new offers is quicker and easier to get through. This is down to more streamlined evidence checks and shorter application forms, designed to help farmers save valuable time. The scheme is also non-competitive, meaning that all farmers who meet the eligibility requirements can get an agreement to deliver a minimum of 3 options, depending on the offer you have selected. Further details are available, visit www.gov.uk/countrysidestewardship

The wildlife offers

Four Countryside Stewardship Scheme offers have been introduced for farmers and land managers. Significant improvements have been made to the scheme to make it simpler and easier for farmers and land managers to apply.

The four new offers are;

- Arable
- Upland
- Lowland Grazing
- Mixed Farming

The Mixed Farming option will provide tailored options covering the full range of different farm types, so farmers and land managers can deliver environmental benefits

Scotland

The Agri-Environment Climate Scheme promotes land management practices which protect and enhance Scotland's natural heritage, improve water quality and manage flood risk. The Agri-Environment Climate Scheme has been extended and will have an annual application round until 2024.

The scheme includes a wide range of options for arable farmers:

- Unharvested conservation headlands
- Wild bird seed for farmland birds
- Forage brassica crops for farmland birds
- Stubbles followed by green manure
- Retention of winter stubbles
- Beetlebanks
- Grass strips in arable fields

Further details can be found on the Scottish rural payment's website www.ruralpayments.org

Wales

Glastir is a 5-year whole farm sustainable land management scheme available to farmers and land managers across Wales. The scheme is split into 3 sections, Entry, Advanced and Commons and its aims are:

- Reducing carbon and greenhouse gas emissions
- Adapting to climate change and building greater resilience into farm businesses
- Managing our water resources to improve water quality and reduce flood risks
- Contributing to economic sustainability of farms, and the wider rural community
- Protecting the landscape and the historic environment while improving access
- Contributing towards a reversal in the decline of Wales' native biodiversity

The scheme includes a wide range of options including:

- Retaining winter stubbles
- Establishing an unsprayed root crop
- Establish a wildlife cover crop
- Unharvested cereal headland

Championing the Farmed Environment (CFE) is encouraging farmers and land managers across England to protect and enhance the environmental value of farmland by taking up voluntary measures. CFE will help you choose the best measure, select the right site and manage the area to maximise the environmental value. You can learn more about the campaign by visiting their website www.cfeonline.org.uk

CS Option
AB13

When you see this graphic on the product pages, it indicates which CS option the variety is suitable for, as detailed in the chart below.

IMPORTANT NOTE:

Whilst we have taken every care in the preparation of this guide, it is not a substitute for reading the official rules and regulations associated with the various schemes currently in operation. It is vitally important that you keep fully up-to-date with the latest regulations in force at the time you make your seed purchasing decisions. This information can normally be obtained from various websites or via direct contact with the appropriate government offices in your locality.

Farmland Birds

The provision of important food resources for farmland birds is vital in the autumn and winter months and more specifically in the hungry gap period between winter and spring.

The Countryside Stewardship Scheme has an autumn sown option to complement the spring sown seed mixtures. The Bumblebird mixture below will provide a food source to both farmland birds and nectar feeding insects.

Seed Mixtures for Specific Farmland Birds

Limagrain has been working with a variety of different agencies to produce a range of seed mixtures specifically to feed some of the UK's favourite birds.

The mixture options have been researched and blended with plant species we know are favoured by specific bird species.

Linnet

- Produces an abundance of small seeds
- Also suitable for tree sparrows and grey partridges

Contains: kale, oilseed rape, red millet, white millet, linseed, mustard and fodder radish

Supplied in 20 kilo 0.5 hectare units

CS Option
AB9, OP2

1 YEAR

Bunting

- Cereal based mixture
- Seed use from September to February
- Also suitable for tree sparrow, yellow hammer and skylarks

Contains: Triticale, spring wheat, spring barley, quinoa, red millet, white millet and fodder radish

Supplied in 20 kilo 0.5 hectare units

CS Option
AB9, OP2

1 YEAR

Bumblebird Mixture

- Abundant supply of small seeds during the winter
- Ideal for tree sparrows and corn buntings
- Pollen and nectar source from early to late summer
- Formulated to attract bumblebees, solitary bees, butterflies and hoverflies
- Autumn sown, establish before 7th September

Mixture Formulation

- Winter Triticale
- Winter wheat
- Fodder radish
- Crimson clover
- Birdsfoot trefoil
- Gold of pleasure
- Kale
- Common vetch
- Alsike clover
- Linseed
- Mustard
- Phacelia

Supplied in 15 kilo 0.5 hectare units

WHY SELECT THIS CROP?

Autumn sown crop for both farmland birds and nectar feeding insects

CS Option
AB16

2 YEAR

Jack Russell

- Fantastic feed source for one year
- Herbicide tolerant
- Inclusion of dwarf sorghum gives structure and winter hardiness
- Seed shed from early Autumn
- Derogation is required before spraying

Mixture Formulation

- Spring Triticale
- Millet blend
- Fodder radish
- Dwarf sorghum
- Dwarf sunflower
- Linseed

Supplied in 20 kilo 0.5 hectare units

WHY SELECT THIS CROP?

A herbicide tolerant mixture with fantastic colour

STOMP AQUA TOLERANT

CS Option
AB9, OP2

1 YEAR

Bird Feeder

- A combination of small seed-bearing crops
- Excellent feed potential
- Wide range of use from wild birds
- Good spread of seed shedding dates
- The ultimate bird feeder!
- Spring sown with 2 year potential

Mixture Formulation

- Kale
- Dwarf sunflower
- Linseed
- Fodder radish
- Mustard
- Millet blend

Supplied in 12.5 kilo 0.5 hectare units

WHY SELECT THIS CROP?

Ideal mixture to provide a succession of food for farmland birds

CS Option
AB9, OP2

2 YEAR

2 WBF (2 Year Winter Bird Food)

- A combination of small seed-bearing crops
- Succession of feed sources
- Triticale and quinoa provide excellent feed for both wild birds and reared game
- Ideally sown on field margins and headlands
- Spring sown with 2 year potential

Mixture Formulation

- Spring Triticale
- Quinoa
- Forage rape
- Kale
- Linseed
- Fodder radish

Supplied in 20 kilo 0.5 hectare units

WHY SELECT THIS CROP?

A great mixture to provide a succession of food for 2 years

CS Option
AB9, OP2

2 YEAR

Crops to Support Pollinators

The National Pollinator Strategy Scheme has been set by the UK Government to ensure pollinators thrive. It aims to provide essential pollination services for crop production, the wider environment and everyone.

The seed mixtures here will provide fantastic areas of flowering plants to help boost the essential food sources for beneficial pollinators, such as bumblebees, solitary bees and butterflies, as well as hover flies.

Multispecies Ley

- Ideal for grassland creation
- A carefully blended mixture containing 40% grasses, 60% legumes and herbs
- Ideal for creating legumes and herb-rich swards
- This mixture is also available with 75% grasses, 25% legumes and herbs

Mixture Formulation

Grasses	Legumes	Herbs/Wildflowers
• Meadow fescue	• Red clover	• Sainfoin
• Tall fescue	• White clover	• Chicory
• Timothy	• Alsike clover	• Ribgrass
• Perennial ryegrass	• Birdsfoot trefoil	• Yarrow
• Festulolium		• Burnet

Supplied in 25 kilo 1 hectare units

CS Option
.....
GS4, OP4, OP5

Flower Rich Margin

- Ideal for field margins and buffers
- The mixture contains a blend of 80% grasses and 20% native wildflowers
- Once established it will be a perfect habitat for bees and butterflies
- The area can be mown in the first year to help tillering

Mixture Formulation

Grasses	Wildflowers	
• Browntop bent	• Agrimony	• Salad burnet
• Chewings fescue	• Birdsfoot trefoil	• Wild carrot
• Crested dogstail	• Knapweed	• Yarrow
• Sheeps fescue	• Black medick	• Red clover
• Slender creeping red fescue	• Kidney vetch	• Ribwort plantain
• Smooth stalked meadow grass	• Oxeye daisy	• Sainfoin
• Strong creeping red fescue	• Ladys bedstraw	• St Johns wort
		• White campion

Supplied in 10 kilo 0.5 hectare units

CS Option
.....
AB8

Bee Mixture

- A blend created to attract and maintain bumblebee populations
- Phacelia acts as a prolific flowering nurse crop whilst the red clover and sainfoin establish
- The phacelia will produce a fantastic display of purple flowers that bees will love
- You will be able to hear the mixture buzz!

Mixture Formulation

• Phacelia	• Vetch
• Birdsfoot trefoil	• Oxeye daisy
• Sainfoin	• Wild carrot
• Alsike clover	• Red clover

Supplied in 7.5 kilo 0.5 hectare units

CS Option
.....
AB1

Legume 2

- Two year sown legume fallow
- Provides food for farmland wildlife, such as pollinators
- If used in the rotation, it will help reduce blackgrass flowering and contaminating arable rotations
- Flowers between early and late summer

Mixture Formulation

- Red clover
- Alsike clover
- Common vetch
- Lucerne
- Sainfoin
- Birdsfoot trefoil

This mixture can also be supplied with perennial ryegrass to help smother competitive weeds

Supplied in 10 kilo 0.5 hectare units

CS Option
.....
AB15

Grass Buffers and Field Margins

The establishment of permanent grass buffer strips will produce new habitats, protect existing landscape features and improve water quality.

If used next to watercourses, buffers and margins can help prevent pollutants and sediments from being transported in surface water run-off. The strips will also provide safe green corridors to link habitats.

Beetle Bank

- Ideal for the creation of 2 metre tussocky grass ridges
- Beetle banks should run from one side of an arable field to the other for maximum benefits
- You may need to cut the grass several times during the first summer to aid establishment
- Provides a good, green corridor for animal movement

Mixture Formulation

- Chewings fescue
- Timothy
- Sheeps fescue
- Cocksfoot
- Meadow fescue
- Smooth stalked meadow grass

Supplied in 10 kilo 0.5 hectare units

CS Option
AB3

MARGIN & BUFFER STRIP SOWING CALCULATOR

HOW MUCH SEED WILL I NEED?

PRODUCT	PACK SIZE	SOWING RATE PER HECTARE	LENGTH OF FIELD MARGIN ONE UNIT WILL SOW		
			2m	4m	6m
Basic Habitat	10 kilos	20 kilos	2500m	1250m	833m
Beetle Bank	10 kilos	20 kilos	2500m	1250m	833m

Flowering grasses can produce a range of food for butterflies. It is often thought that food is only provided by flowers, but the chart below shows which grass species provide food for different UK butterflies

BUTTERFLY FOOD CHART

PLANT SPECIES	BUTTERFLY							
	GATEKEEPER	MEADOW BROWN	COMMON BLUE	SKIPPERS	RINGLET	SMALL HEALTH	GRAYLING	MABLE WHITE
Agrostis spp	🦋	🦋				🦋		
Birdsfoot trefoil			🦋	🦋				
Cocksfoot		🦋		🦋	🦋			
Meadow grass	🦋	🦋			🦋	🦋		
Sheeps fescue							🦋	🦋
Timothy				🦋				

Basic Habitat

- Ideally suited for either 2, 4 or 6 metre buffer strips
- Contains grasses that are the food plants of several butterflies and insects
- Once established, the mixture can help protect habitats from sprays and fertiliser applications
- Sow in spring or autumn

Mixture Formulation

- Chewings fescue
- Bent grass
- Smooth stalked meadow grass
- Timothy
- Tall fescue
- Meadow fescue
- Red fescue

Supplied in 10 kilo 0.5 hectare units

CS Option
SW1, SW3, SW4

You are eligible to apply for an SFI standards agreement if you're a farmer or landowner who is eligible to the Basic Payment Scheme, with land in England. The aim of this new scheme is the aim of the scheme is to protect the soil surface and provide root growth that maintains soil structure, supports biology, and minimises nutrient, and soil run off.

The scheme has three standards

1. Arable and Horticultural soils
2. Improved Grassland soils
3. Moorland

Arable and Horticultural Soils Standard

The Arable and Horticultural Soils Standard has different levels of payment; **Introductory** and **Immediate**, with agreements lasting three years.

You are required to complete a soil management plan, test the soil for organic matter and to produce a well-established winter cover across at least 70% of land entered into the standard each year.

You can choose a seeds mixture that works well on your farm.

Well established is defined as green cover that has enough vegetation that is sufficiently grown to protect the soil from the start of December.

You must keep the green cover until the end of February, after which you can destroy the cover.

Introductory Level

Sown green cover - this could include autumn sown crops: winter cereals, linseed, winter oilseed rape, weedy stubbles or a quick growing cover crop, providing they produce sufficient soil cover.

SUITABLE QUICK GROWING COVER CROPS:

Forage Rye - Humbolt

Fast growing forage rye type, ideal for producing dense cover and soil coverage. Humbolt can lift and hold N until the crop is incorporated.

Sow at 175 kilos per ha

Lift N Fix

A combination of Humbolt forage rye and vetch. Fast establishment with the added value of N fixing vetch legume.

Sow at 70-80 kilos per ha

Intermediate Level

You are required to complete a soil management plan, test the soil for organic matter and to establish a multispecies green cover which consists of a mixture of at least 2 species from one or more plant families below;

- Brassica
- Grass or cereal
- Legume
- Herbs

At this level you must have a well-established green cover on at least 50% of the land entered into this level of the standard and multispecies cover crops on at least an additional 20% of the land entered into this level of the standard.

Remember that the more species you use, the greater benefit for the soil.

SUITABLE MULTISPECIES SEEDS MIXTURES

Lift N Fix

A combination of Humbolt forage rye and vetch. Fast establishment with the added value of N fixing vetch legume.

Sow at 70-80 kilos per ha

Green Reward

A mixture of Humbolt rye, black oats, radish, mustard and phacelia. Multispecies blend for maximum organic matter production.

Sow at 50 kilos per ha

Soil Improver

A combination of winter oats, radish, phacelia and mustard. Cereal based with deep rooting radish and mustard varieties.

Sow at 50 kilos per ha

Improved Grassland Soil Standard

The aim of this scheme is to minimise bare soil over the winter, by establishing an early reseed which will also help prevent livestock poaching and avoid bare patches around gateways and feeding troughs.

You must complete a soil improvement plan, test the soil organic matter, minimise bare ground and establish and maintain herbal leys.

Herbal seed mixtures should contain the following:

- 5 species grass
- 3 species legumes
- 5 species herbs

SUITABLE HERBAL SEEDS MIXTURE:

Multispecies Ley

Designed to provide soil cover with productive grazing and cutting. This mixture contains a proven blend of grasses, legumes and herbs.

Sow at 25 kilos per ha

Mixture Composition

We have carefully formulated our wildflower mixtures to suit a number of different habitats and soil types. This can range from a sandy soil to a hedgerow habitat. Low maintenance grass species (see panel below) are included in the mixtures to act as a nurse crop in the early years of establishment and growth. The grasses help suppress weed invasion, whilst allowing the wildflowers to flourish.

All our Wildflower mixtures contain 80% grasses and 20% native British produced wildflowers

80% Grasses

- | | |
|-----------------------------|--------------------------------|
| Browntop bent | <i>Agrostis capillaris</i> |
| Chewings fescue | <i>Festuca rubra commutata</i> |
| Crested dogtail | <i>Cynosurus cristatus</i> |
| Sheep's fescue | <i>Festuca ovina</i> |
| Slender creeping red fescue | <i>Festuca rubra litoralis</i> |
| Smooth stalked meadow grass | <i>Poa pratensis</i> |
| Strong creeping red fescue | <i>Festuca rubra rubra</i> |

Wildflower Management Guidelines

Select a weed-free site of low fertility. Fertiliser should not be used, since broad-leaved and grass weeds, together with cultivated grasses contained in standard mixtures, can be highly competitive on fertile soils. This can adversely affect seed germination, establishment and subsequent growth. However, increased grass cutting can help to counteract over-competitive growth.

Control weeds before sowing. Annual weeds may be hoed, buried or killed with a contact herbicide. Perennial weeds should be eradicated by a translocated glyphosate-based herbicide. Sow mixtures either from early March to early May, or from early August to mid-September. This will ensure optimum establishment of most species.

Cultivate the ground to provide a fine, weed-free seed bed. Firm if necessary. Take care to sow evenly, at the recommended rate. Thoroughly mixing one part seed with four parts dry sand makes it more easily distributed. Rake the seed in lightly with a spring-tined rake and firm the soil by treading or, preferably, rolling. This ensures that the seed comes into contact with moisture in the soil.

Water with a fine spray. This will avoid disturbing the surface of the soil. Keep the area well-watered and free from any unwanted plants.

Cut the sward every six to eight weeks during the first year after sowing and remove the cuttings. This will prevent the grass from over growing the slower growing wildflowers.

In the following years, cut in early spring, before growth starts, and in October, after all wildflower seeds have been shed. Remove the cuttings.

Wildflower Sowing Guide

LG 1 Woodland and Heavy Shade

- A carefully selected mixture suitable for shaded areas and woodlands
- Sowing rate 3-5g/m²
- Pack size 1 kilo

Betony
Stachys officinalis

Bluebell
Hyacinthoides non-scripta

Foxglove
Digitalis purpurea

Garlic Mustard
Alliaria petiolata

Hedge Bedstraw
Galium mollugo

Hedge Woundwort
Stachys sylvatica

Nettle-Leaved Bellflower
Campanula trachelium

Red Campion
Silene dioica

Self Heal
Prunella vulgaris

Wild Angelica
Angelica sylvestris

Wood Avens
Geum urbanum

Wood Sage
Teucrium scorodonia

LG 2 Wetland and Water Meadow

- Suitable for damp, moist and wet soils including saturated banks of ponds, streams, rivers and ditches
- Sowing rate 3-5g/m²
- Pack size 1 kilo

Betony
Stachys officinalis

Greater Birdsfoot Trefoil
Lotus uliginosus

Common Knapweed
Centaurea nigra

Meadow Buttercup
Ranunculus acris

Meadowsweet
Filipendula ulmaria

Oxeye Daisy
Leucanthemum vulgare

Purple Loosestrife
Lythrum salicaria

Ragged Robin
Lychnis flos-cuculi

Red Campion
Silene dioica

Self Heal
Prunella vulgaris

Sneezewort
Achillea ptarmica

Water Avens
Geum rivale

LG 3 Limestone Mix

- On soils overlying limestone or chalk, particular types of flowers can be found, and these are contained in this carefully selected blend of species
- Sowing rate 3-5g/m²
- Pack size 1 kilo

Agrimony
Agrimonia eupatoria

Betony
Stachys officinalis

Black Medick
Medicago lupulina

Common Birdsfoot Trefoil
Lotus corniculatus

Knapweed
Centaurea nigra

Cowslip
Primula veris

Dandelion
Taraxacum officinale

Field Scabious
Knautia arvensis

Greater Knapweed
Centaurea scabiosa

Hoary Plantain
Plantago media

Kidney Vetch
Anthyllis vulneraria

Oxeye Daisy
Leucanthemum vulgare

Salad Burnet
Sanguisorba minor

Self Heal
Prunella vulgaris

Wild Basil
Clinopodium vulgare

Wild Carrot
Daucus carota

Wild Mignonette
Reseda lutea

Yarrow
Achillea millefolium

Yellow Rattle
Rhinanthus minor

LG 4 Clay and Heavy Soils

- This mixture can be sown on all clay soils and uses species typically found on this soil type
- Sowing rate 3-5g/m²
- Pack size 1 kilo

Birdsfoot Trefoil
Lotus corniculatus

Bulbous Buttercup
Ranunculus bulbosus

Common Vetch
Vicia sativa

Knapweed
Centaurea nigra

Lady's Bedstraw
Galium verum

Lesser Trefoil
Trifolium dubium

Oxeye Daisy
Leucanthemum vulgare

Salad Burnet
Sanguisorba minor

Self Heal
Prunella vulgaris

Teasel
Dipsacus fullonum

Wild Carrot
Daucus carota

LG 5 Acid Soils Mix

- The flowers selected in this mixture naturally occur on soils characterised by a low pH, which allows you to produce a flowery sward on a range of acid soils
- Sowing rate 3-5g/m²
- Pack size 1 kilo

- | | | |
|--|---|---|
| Common Bird's-foot Trefoil
<i>Lotus corniculatus</i> | Devil's-Bit Scabious
<i>Succisa pratensis</i> | Ragged Robin
<i>Lychnis flos-cuculi</i> |
| Common Knapweed
<i>Centaurea nigra</i> | Lady's Bedstraw
<i>Galium verum</i> | Self Heal
<i>Prunella vulgaris</i> |
| Common Sorrel
<i>Rumex acetosella</i> | Meadow Buttercup
<i>Ranunculus acris</i> | White Campion
<i>Silene alba</i> |
| Common Toadflax
<i>Linaria vulgaris</i> | Musk Mallow
<i>Malva moschata</i> | Wild Basil
<i>Clinopodium vulgare</i> |
| Common Vetch
<i>Vicia sativa</i> | Oxeye Daisy
<i>Leucanthemum vulgare</i> | Yellow Rattle
<i>Rhinanthus minor</i> |
| Dandelion
<i>Taraxacum officinale</i> | St John's-Wort
<i>Hypericum perforatum</i> | |

LG 6 General Purpose/Loam Soils

- This mixture is suitable for establishing flowery grassland on all loam/alluvial type soils and can produce a rich, diverse sward
- Sowing rate 3-5g/m²
- Pack size 1 kilo

- | | |
|--|---|
| Betony
<i>Stachys officinalis</i> | Lady's Bedstraw
<i>Galium verum</i> |
| Common Bird's-foot Trefoil
<i>Lotus corniculatus</i> | Oxeye Daisy
<i>Leucanthemum vulgare</i> |
| Bulbous Buttercup
<i>Ranunculus bulbosus</i> | Salad Burnet
<i>Sanguisorba minor</i> |
| Catsear
<i>Hypochaeris radicata</i> | Self Heal
<i>Prunella vulgaris</i> |
| Cowslip
<i>Primula veris</i> | White Campion
<i>Silene latifolia</i> |
| Common Knapweed
<i>Centaurea nigra</i> | |

LG 7 Hedgerow and Semi Shade

- Suitable for field and woodland margins
- Sowing rate 3-5g/m²
- Pack size 1 kilo

- | | |
|--|--|
| Betony
<i>Stachys officinalis</i> | Red Campion
<i>Silene dioica</i> |
| Common Knapweed
<i>Centaurea nigra</i> | Self Heal
<i>Prunella vulgaris</i> |
| Garlic Mustard
<i>Alliaria petiolata</i> | Teasel
<i>Dipsacus fullonum</i> |
| Hairy St John's-Wort
<i>Hypericum hirsutum</i> | Wood Avens
<i>Geum urbanum</i> |
| Hedge Bedstraw
<i>Galium mollugo</i> | Yarrow
<i>Achillea millefolium</i> |
| Hedge Woundwort
<i>Stachys sylvatica</i> | |

LG 8 Sandy/Dry Soils Mix

- On free draining sandy soils, we advise the use of this mixture to recreate a meadow typical for this soil type
- Sowing rate 3-5g/m²
- Pack size 1 kilo

- | | | |
|---|--|---|
| Black Medick
<i>Medicago lupulina</i> | Kidney Vetch
<i>Anthyllis vulneraria</i> | Self Heal
<i>Prunella vulgaris</i> |
| Bird's-foot Trefoil
<i>Lotus corniculatus</i> | Lady's Bedstraw
<i>Galium verum</i> | Viper's Bugloss
<i>Echium vulgare</i> |
| Knapweed
<i>Centaurea nigra</i> | Musk Mallow
<i>Malva moschata</i> | White Campion
<i>Silene alba</i> |
| Dandelion
<i>Taraxacum officinale</i> | Oxeye Daisy
<i>Leucanthemum vulgare</i> | Wild Carrot
<i>Daucus carota</i> |
| Field Forget-Me-Not
<i>Myosotis arvensis</i> | Perforate St John's-Wort
<i>Hypericum perforatum</i> | Wild Mignonette
<i>Reseda luteola</i> |
| Hoary Plantain
<i>Plantago media</i> | Ribwort Plantain
<i>Plantago lanceolata</i> | Yarrow
<i>Achillea millefolium</i> |
| | | Yellow Rattle
<i>Rhinanthus minor</i> |

Crops for Game & Wildlife Management

Crop options for winter holding, brood rearing and game drives

Cover crops can provide additional drives, autumn and winter feed as well as fantastic environmental benefits for wildlife. Over the last few years, we've seen an increase in the use of multispecies seed mixtures, some of which are herbicide tolerant, and will provide a more diverse habitat than single sown species.

Hibird maize blend

- Our best selling gamecover maize
- All varieties selected for good early vigour and standing ability
- A medium maturing variety
- FAO maturity class 180
- Different crop heights allow for easier bird access
- Robust, providing full season feed
- Laboratory tested for germination
- Seed is treated with Korit for bird protection

CROP HEIGHT 180-200cm

Packed in 50,000 seed units

WHY SELECT THIS CROP?

Medium height ideal for most soils and situations

Straight game maize

- Medium/late variety
- Good standing ability for full season use
- Laboratory tested for germination
- Large cobs and enhanced feed value
- Seed is treated with Korit for bird protection

CROP HEIGHT 190-210 cm

Packed in 50,000 seed units

WHY SELECT THIS CROP?

Large cobs provide additional feed value combined with excellent cover

Maize for Gamecover

Maize for gamecover can sometimes be troublesome, especially if you are following maize after maize in the rotation. Some other crop options to consider are:

- Jack Russell seeds mixture, see page 7 – great season long cover, stomp aqua tolerant and eligible for CSS AB9 and OP2 options
- Brassica break from Maize, see page 25 Cocker mixture
- Rats and badgers a problem? see page 19 (opposite) for medium height intermediate sorghum

Dwarf Shorty

- Ideal for driving and winter cover
- Can make excellent flushing points within maize
- Excellent replacement for kale
- Adds warmth to maize crops when sown adjacent
- Weed control possible
- Not suitable for Northern England or Scotland

CROP HEIGHT 90-100cm

Supplied in 12.5 kilo 0.5 hectare units

WHY SELECT THIS CROP?

Low crop canopy provides warmth and security, making Shorty the ultimate driving crop

Intermediate DP2

- Ideal replacement for maize
- Makes excellent controlled driving cover
- Herbicide use possible
- Similar height to maize
- Best sown in June

CROP HEIGHT 120-150cm

Supplied in 12.5 kilo 0.5 hectare units

WHY SELECT THIS CROP?

If rats and badgers are a problem, Intermediate can provide a similar height to maize crops without the cob!

Giant Jumbo Star

- Tall, dense cover ideally used for a windbreak around maize
- Good vigour and fast growth
- Later drilled crops will have reduced height potential
- Crops can screen guns allowing them to get in position without disturbing the birds

CROP HEIGHT 200-220cm

Supplied in 12.5 kilo 0.5 hectare units

WHY SELECT THIS CROP?

Jumbo Star can be sown later than other sorghums, just watch it grow!

Caledonian

- The first kale bred with clubroot tolerance
- A taller kale allowing for easier bird access
- Winter hardy
- Excellent germination and vigour potential
- British bred, reliable and trusted
- Seed available with Start-uP® nutrient package
- Sow at 5 kilos per hectare

CROP HEIGHT 90-100cm

Supplied in 5 kilo 1 hectare units

WHY SELECT THIS CROP?

Why run the risk of crop failure? Caledonian comes with clubroot tolerance

Keeper

- A shorter variety with excellent lodging resistance
- Excellent leaf canopy with a bare floor
- High leaf to stem ratio
- British bred and fully tested for germination and vigour to ensure maximum establishment
- Winter hardy
- Seed available with Start-uP® nutrient package
- Sow at 5 kilos per hectare

CROP HEIGHT 80-90cm

Supplied in 5 kilo 1 hectare units

WHY SELECT THIS CROP?

A high leaf to stem ratio ensures maximum cover and protection for your birds

START-UP® SEED

START-UP ADVANCED SEED TREATMENT TO PROMOTE EARLY ROOT DEVELOPMENT

Start-uP® consists of a unique combination of soluble nutrients and bio-active compounds. It contains a highly mobile form of phosphorus known as phosphite – a molecule which can move through the major transport routes of the plant (the xylem and phloem) much faster than conventional phosphate fertiliser.

Combined with a naturally derived bio active complex to promote **rapid early root development and maintain overall plant health**, Start-uP® is able to provide a readily available source of **essential nutrients** and other beneficial compounds precisely when and where they are most needed by the plant.

Carbon (Kale x Mustard)

- Excellent cover produced in a short period of time
- Best sown in June or July
- Excellent cover by November
- Frost tolerant
- Ideal for new sowings or for patching existing areas
- Can be sown into cereal stubble
- Seed is treated with Start-uP® nutrient package
- Sow at 4 kilos per hectare

CROP HEIGHT 60-100cm

Supplied in 2 kilo 0.5 hectare units

WHY SELECT THIS CROP?

Fantastic dry cover produced in a short period of time

Interval (Rape/Kale hybrid)

- Fantastic fast growing rape with kale parentage
- Excellent establishment and early vigour
- Ideal replacement for kale when sown in June or July
- Winter hardy, full season cover
- Can be used as a pioneer or rescue crop
- Seed available with Start-uP® nutrient package
- Sow at 5 kilos per hectare

CROP HEIGHT 50-100cm

Supplied in 5 kilo 1 hectare units

WHY SELECT THIS CROP?

Crop failed or left it late? Interval is the ultimate fast growing cover provider

Skyfall (Bounce Back Brassica)

- Fast growing and leafy
- Late sown option for June to August
- Large leaves for extra cover
- Can be successfully grazed after use
- Can be sown into cereal stubble
- Seed is treated with Start-uP® nutrient package
- Sow at 5 kilos per hectare

CROP HEIGHT 30-40cm

Supplied in 2.5 kilo 0.5 hectare units

WHY SELECT THIS CROP?

Late sown cover provider, ideal for partridges

Magic Millet

- Dense reed millet
- Ideal for use alongside maize
- Windproof and warming
- Good flushing point
- Also contains red and white millet for feed value
- Winter hardy

CROP HEIGHT 100-120cm

Supplied in 10 kilo 1 hectare unit

WHY SELECT THIS CROP?

Winter hardy millet for later use

Top Flush Millet

- A carefully blended mixture of red, panorama and white millets
- Mixture ensures a wider window of seed shed
- Feed value from September to December
- Provides an excellent feed block if sown adjacent to maize
- Can be cross drilled or broadcast in maize crops to add feed value and warmth

CROP HEIGHT 80-100cm

Supplied in 10 kilo 1 hectare units

WHY SELECT THIS CROP?

Feeding birds can be expensive, why not grow your own feed and reduce your costs?

Proso White Millet

- This high yielding variety will provide huge seed yields
- Ideal for use with maize crops
- Can be used as a feeding block or flushing point
- Sow at 10-15 kilos per hectare

CROP HEIGHT 80-100cm

Supplied in 25 kilo 1 hectare units

We can also supply:

- Red Millet
- Tanka Millet Mix

WHY SELECT THIS CROP?

Huge seed yields will provide additional feed and prevent birds from roaming

Sunflowers

Sunflowers have travelled the world since their discovery in America, where native Americans domesticated and bred the plant. Spanish boats crossed the Atlantic Ocean and christened the plant *Helianthus annuus* from the Greek "Helios" meaning sun.

Used initially as an ornamental plant until an English inventor - Arthur Bunyan developed a method for extracting the oil from the seeds.

Sunflowers sown in April or early May can grow quickly in warm weather; flowers begin to form in June and show colour by the end of July and August. Flowering lasts approximately 2-3 weeks and seed use by farmland birds and game can begin in early October.

Sunspot

- Large, attractive flowers
- Excellent seed production
- Good standing ability
- Used by finches and game birds
- From Limagrain's plant breeding programme

CROP HEIGHT 130-150cm

Supplied in 12.5 kilo 1 hectare units

WHY SELECT THIS CROP?

Excellent autumn feed source for game & farmland birds

STOMP AQUA TOLERANT

CS Option
AB9, OP2

STOMP AQUA TOLERANT

Jack Russell

- Fantastic feed source for one year
- Herbicide tolerant
- Inclusion of dwarf sorghum gives structure and winter hardiness
- Seed shed from early autumn
- Derogation is required before spraying

CROP HEIGHT 150-200cm

Mixture Formulation

- Spring Triticale
- Dwarf sorghum
- Millet blend
- Dwarf sunflower
- Fodder radish
- Linseed

Supplied in 20 kilo 0.5 hectare units

Golden Retriever

- Stomp Aqua tolerant
- Excellent full season cover combined with seed shed potential
- Ideal driving cover for pheasants or partridges
- Winter holding potential
- Attractive to wild birds as well!

CROP HEIGHT 200-220cm

Mixture Formulation

- Dwarf sorghum
- Dwarf sunflowers
- Millet blend
- Fodder radish

Supplied in 12.5 kilo 0.5 hectare units

BUTISAN 'S' TOLERANT

Cocker

- Butisan 'S' tolerant
- If weed control is your priority, this is the mixture for you!
- Full season cover for 2 years
- Derogation is required before spraying

CROP HEIGHT 80-90cm

Mixture Formulation

- Caledonian kale
- Mustard
- Fodder radish
- Linseed

Supplied in 8 kilo 0.5 hectare units

2 YEAR

CS Option
AB9, OP2

Setter

- Two year, full season cover and feed
- Traditional mixture using a wide range of species
- Excellent seed shed from September onwards
- Fantastic for insect use
- Perfect winter holding cover
- Fully tried and tested

CROP HEIGHT 150-200cm

Mixture Formulation

- Mustard
- Kale
- Sweet clover
- Buckwheat
- Linseed
- Dwarf sunflower
- Maize

Supplied in 12.5 kilo 0.5 hectare units

2 YEAR

Labrador

- Two year full season cover and feed
- Ideal for use in cooler, more exposed areas
- Triticale cereal helps prevent rabbit damage
- Brood rearing potential

CROP HEIGHT 100cm

Mixture Formulation

- Spring Triticale
- Linseed
- Mustard
- Quinoa
- Kale

Supplied in 20 kilo 0.5 hectare units

STOMP AQUA TOLERANT

Stomp Aqua is effective against:

- Grass weeds
- Pansy
- Speedwells
- Chickweed
- Knotgrass
- Shepherd's purse
- Dead nettle
- Nettle

BUTISAN 'S' TOLERANT

Butisan 'S' is effective against:

- Annual meadow grass
- Shepherd's purse
- Chickweed
- Dead nettle
- Groundsel
- Speedwells
- Mayweed
- Cranesbill

WHY SELECT THIS CROP?

Setter will provide you with cover and feed throughout a two year period

WHY SELECT THIS CROP?

Labrador will tolerate low pH and difficult soil types

Spaniel

- Summer sown drought tolerant cover mixture
- Can be broadcast into cereal stubble
- Useful for patching areas where drought or flea beetle damage has occurred
- Fodder radish retains its seeds late into the season
- More winter hardy than mustard

CROP HEIGHT 80-100cm

Mixture Formulation

- Carbon
- Mustard
- Interval rape/kale
- Fodder radish

Supplied in 5 kilo 0.5 hectare units

WHY SELECT THIS CROP?

If your crop has failed or established poorly, this fast growing recovery mixture can save the day!

Canary Grass

(*Phalaris Aquatica*)

- Perennial cover
- Will grow on poor soils and exposed areas
- Second year growth can reach 2 metres
- It takes two years to become fully established
- Driving or nesting cover

CROP HEIGHT 50-60cm (first year)
150cm (subsequent years)

Supplied in 3 kilo 0.5 hectare units

WHY SELECT THIS CROP?

Perennial habitat lasting 3 - 4 years

Interval

(Rape/Kale hybrid)

- Fantastic fast growing rape with kale parentage
- Excellent establishment and early vigour
- Ideal replacement for kale when sown in June or July
- Winter hardy, full season cover
- Can be used also as a pioneer or rescue crop

CROP HEIGHT 50-100cm

Supplied in 5 kilo 1 hectare units

WHY SELECT THIS CROP?

Crop failed or left it late? Interval is the ultimate fast growing cover provider

Reed Canary Grass

(*Phalaris Arundinacea*)

- Tall perennial cover
- Driving and nesting cover potential
- A UK native species
- Can be sown on difficult soil types
- Produces stolons and creeps
- Sow in 30" wide rows

CROP HEIGHT 50-60cm (first year)
150cm (subsequent years)

Supplied in 3 kilo 0.5 hectare units

WHY SELECT THIS CROP?

Wood or hedgeside perennial cover

Carbon

(Kale x Mustard)

- Excellent cover produced in a short period of time
- Best sown in June or July
- Excellent cover by November
- Frost tolerant
- Ideal for new sowings or for patching existing areas
- Can be sown into cereal stubble
- Seed is treated with Start-up® nutrient package

CROP HEIGHT 60-100cm

Supplied in 2 kilo 0.5 hectare units

WHY SELECT THIS CROP?

Fantastic dry cover produced in a short time

Chicory

- Perennial chicory
- Spring sown
- Excellent driving cover in second year
- Deep rooted
- Drought tolerant
- Best mixed with other species in first year

CROP HEIGHT 30-40cm (first year)
150-200cm (subsequent years)

Supplied in 3 kilo 0.5 hectare units

WHY SELECT THIS CROP?

Tall, spectacular cover

Sandoval Quinoa

- Capable of shedding up to 2 tonnes per hectare
- Sheds high protein seed which will help reduce feed bills
- Seeds are highly sought by pheasants, partridges and farmland birds
- Ideal for use with companion crops such as Bombardier kale or Interval rape/kale hybrid

CROP HEIGHT 80-150cm

Supplied in 5 kilo 0.5 hectare units

Brown Mustard (*Brassica Juncea*)

- Fast growing
- Excellent biomass production
- Grows taller than white mustard
- Ability to help suppress certain soil borne nematodes

CROP HEIGHT 90-100 cm

Sow at 10 kilos per hectare

Buckwheat

- Thick, bushy seed producing plant
- Seed shed occurs in early autumn
- Very fast establishment with some weed smothering properties
- Can be used adjacent to flight ponds to attract ducks and geese
- Can be sown in woodland glades
- Sown at 50 kilos per hectare

CROP HEIGHT 70-120cm

Supplied in 10 kilo or 25 kilo units

Linseed

- Very fast establishment
- Tolerates a wide range of soil types
- Broken canopy is very attractive to partridges
- Autumn seed shed produces a palatable feed
- Sown at 60 kilos per hectare

CROP HEIGHT 60-70cm

Supplied in 25 kilo units

Sweet Clover

- A nectar producing biennial clover
- Thrives on neutral and calcareous soils
- Ability to fix "free nitrogen"
- Second year growth can reach 1-2 metres in height
- Best sown in conjunction with kale or canary grass

CROP HEIGHT 85-150cm

Supplied in 5 kilo 0.5 hectare units

Fodder Radish

- Very fast growth
- Good weed suppressant
- Seeds are used by wild birds late into winter
- Can be used for biomass green manure
- Sown at 20 kilos per hectare

CROP HEIGHT 60-80cm

Supplied in 5 kilo or 20 kilo units

Phacelia

- Extremely fast growing catch crop
- Brilliant pretty blue flowers attract huge numbers of insects
- Pollen and nectar provider
- Competes well with weeds
- Care should be taken in following crops, as phacelia can reseed itself readily

CROP HEIGHT 30-60cm

Supplied in 5 kilo 0.5 hectare units

Texcel Greens

- Summer sown cover crop
- Better winter hardiness than white mustard
- Ideal for use on areas where spring sown cover has failed
- Sown at 5 kilos per hectare

CROP HEIGHT 40-70cm

Supplied in 1 kilo units

Mustard

- Fast establishment and drought tolerant cover
- Ideal summer sown catch crop
- Broadcast or drill into cereal stubble
- Resilient to rabbit damage because of its rapid establishment
- Drill at 20 kilos per hectare

CROP HEIGHT 30-100cm

Supplied in 10 kilo or 20 kilo units

Spring Triticale

- The best cereal crop for gamecover situations
- Spring sown
- Increased seed head emergence and feed value
- Will tolerate poorer soils with low pH levels
- Resilient to rabbit damage
- Seed heads should remain late into the winter months
- Sow at 125 kilos per hectare

CROP HEIGHT 90-100cm

Supplied in 25 kilo units

Stubble Turnip

- A very fast-growing cover provider
- Ready to utilise in 12 weeks from sowing
- Tankard shaped varieties like Samson grow out of the ground and therefore hold their leaves higher for improved canopy
- Ideal for sowing in the summer and autumn (less weed pressure)
- Can be grazed by sheep afterwards

CROP HEIGHT 80-100cm

Supplied in 5 kilos 1 hectare units

Estate Grass Mixture

- Ideal for producing release pen areas
- Amenity grasses produce a good dense floor
- Hardwearing
- Ideal for birds to dry off and feed
- Can be left uncut to produce taller cover
- Estate can grow in shaded areas

Mixture Formulation

- Amenity perennial ryegrass
- Creeping red fescue

Supplied in 20 kilo units

WHY SELECT THIS CROP?

Great for professional release pen areas

Beetle Bank

- Ideal for the creation of 2 metre tussocky grass ridges
- Beetle banks should run from one side of an arable field to the other for maximum benefits
- You may need to cut the grass several times during the first summer to aid establishment
- Good green corridor for animal movement

Mixture Formulation

- Chewings fescue
- Timothy
- Sheeps fescue
- Cocksfoot
- Meadow fescue
- Smooth stalked meadow grass

Supplied in 10 kilo 0.5 hectare units

WHY SELECT THIS CROP?

Great habitat for insects and small mammals

Festival

- Tall growing mixture, 1m - 1.5m, ideal for adding a splash of colour to any dull area
- Contains new varieties, such as Sunbow Zinnia, which provides several waves of flowers over a longer time period
- Good ground cover and a source of insects and wildlife
- Appropriate mixture for dry land

Floral Arrangement:

Annuals, 5 flowers

Sowing: April - May, 2g/m²

Germination: 8-10 days in the correct conditions

Flowering: Mid-June to mid-November

Aurora

- Medium height mixture, around half a metre tall
- New varieties; Sunbow Zinnia and Trianon Cosmos provide more effective and long-lasting flowering
- Ideal for soil with more organic material and nutritive mineral elements

Floral Arrangement:

Annuals, 5 flowers

Sowing: April - May, 2g/m²

Germination: 8-10 days in the correct conditions

Flowering: from mid-June to early November

Colour Splash PACKAGING OPTIONS:
4 kg bag or a 400 gram ring pull can

Honey Bee

- Tall growing mixture, around 1m to 1.5m
- Composed of flowering plants for landscaping which will attract insects
- Perfect mix for attracting pollinating insects, and honey bees. You'll create a real buzz
- Yellow Cosmos, Godetia and Black Eyed Susan are included in the mixture

Floral Arrangement:

Annuals, 11 flowers

Sowing: April - June 2g/m²

Germination: 8-10 days in the correct conditions

Flowering: Mid-June to mid-October
